## Set up your Essential Video Doorbell Wired

Your Arlo Essential Video Doorbell Wired requires a wired doorbell and chime with voltage between 16 – 24VAC.

The 24VAC transformer is provided for homes with doorbell systems that use voltages outside this range. If the transformer is required, have it installed by a certified electrician.

1

Find your doorbell, chime box, and the electrical panel at your home.

2

Download the Arlo app from the App Store or Google Play.

3

Follow the step by step instructions in the Arlo app to install.

**WARNING: To prevent fire and injury, connect the Arlo Video Doorbell and Power Kit only to voltage between 16 – 24VAC.**

## What's in the box

---

Doorbell and plate  
(These parts are attached)

Angled  
mounting  
plate

24VAC  
Transformer

Power Kit

Release pin

Wall screws and anchors

Optional wire extensions, wire  
fasteners, and extra screws

## Tools

---

- A Phillips head screwdriver is required to install the doorbell (not provided).
- You might also benefit from having a drill, a level, and a ladder (to reach the chime).
