Get the app

Download the free Arlo app to get started.

The app guides you through setting up your bridge.

Note: If you already use the Arlo app, make sure that you are using the latest version.

Find the best spot for your bridge

After you place your lights, move your bridge as needed to a location that optimizes the signal between your lights and your bridge.

To optimize your bridge location, do the following:

- Make sure that your bridge is within range of your WiFi router.
- Elevate your bridge by plugging it into an outlet that is located above ground level, such as above a counter.
- Do not plug the bridge into a power strip that is on the floor.
- Try to minimize the number of walls between your bridge and your lights. Thick or insulated walls can reduce the range.

You're done!

Congratulations! Your Arlo Bridge is set up and ready to go.

Use the Arlo app to add an Arlo Security Light to your bridge or to reassign a security light from another bridge.
